INDRA – Data Breach Notification Report

PRELIMINARY NOTIFICATION

Automatically generated and submitted to the Data Protection Board of India under the Digital Personal Data Protection (DPDP) Act, 2023

Incident ID	INC-TEST01
Detected at (server time)	2026-08-30 08:05:18
Report generated at	2026-08-30 08:05:18
72-hour reporting deadline	2026-09-02 08:05:18
Hours remaining to report	72.0
Compliance status	WITHIN 72-HOUR WINDOW

1. Nature of the Incident

An unauthorized login was detected on the company data portal after multiple failed authentication attempts from a single source, consistent with a credential brute-force attack. The account subsequently authenticated successfully. In accordance with the system's deception-based defense (honeypot) design, the session was automatically flagged as suspicious and served synthetic decoy customer data instead of genuine personal data. No genuine personal data belonging to real data principals was exposed.

2. Data Access Event (captured at time of download)

Timestamp	2026-08-30 08:05:18
Source IP (as seen by server)	203.0.113.5
ISP / Organization	Test ISP
User-Agent	TestAgent/1.0
Data served	Synthetic decoy dataset (honeypot); all sensitive fields SHA-256 hashed before export — no

Note: any apparent IP masking (e.g. VPN) affects only the client-side display — the server-observed source IP above reflects the actual network connection used to request the data.

3. Attacker Attribution (Canary-Token Confirmation)

Timestamp	IP Address	ISP / Org	Screen	Timezone	Platform
08:05:18	203.0.113.5	Test ISP	1920x1080	Asia/Kolkata	Win32

The attacker's apparent network location was masked at first login (e.g. via VPN/proxy). A canary token embedded in the decoy data export phoned back when the attacker opened/previewed the file, revealing the true connecting IP address and device fingerprint captured above -- via ordinary browser JavaScript in that one preview tab, no exploit involved.

4. Data Categories Potentially at Risk (if defenses had failed)

Name, phone number, email address, Aadhaar number, PAN, postal address, and partial payment card details -- all categories of personal data under the DPDP Act, 2023.

5. Remedial & Preventive Measures Taken

• Suspicious session automatically isolated to a decoy data environment.

• Real-time alert generated to the Data Protection Officer / admin.

• Attacker source attributed via canary-token forensic technique.

• Report auto-generated and logged as submitted to the Data Protection Board.

• Incident logged for audit trail and regulatory reporting.

6. Alert Log

Time	Level	Message
08:05:18	CRITICAL	Unauthorized login detected
