TRAPWIRE – Data Breach Notification Report

PRELIMINARY NOTIFICATION

Automatically generated and submitted to the Data Protection Board of India under the Digital Personal Data Protection (DPDP) Act, 2023

Incident ID	INC-C939F8FC
Detected at (server time)	2026-10-03 09:40:00
Report generated at	2026-10-03 09:40:00
72-hour reporting deadline	2026-10-06 09:40:00
Hours remaining to report	72.0
Compliance status	WITHIN 72-HOUR WINDOW

1. Nature of the Incident

An unauthorized login was detected on the company data portal after multiple failed authentication attempts from a single source, consistent with a credential brute-force attack. The account subsequently authenticated successfully. In accordance with the system's deception-based defense (honeypot) design, the session was automatically flagged as suspicious and served synthetic decoy customer data instead of genuine personal data. No genuine personal data belonging to real data principals was exposed.

2. Data Access Event (captured at time of download)

No data access event recorded yet.

3. Attacker Attribution (Canary-Token Confirmation)

No canary token has been triggered yet for this session.

4. Data Categories Potentially at Risk (if defenses had failed)

Name, phone number, email address, Aadhaar number, PAN, postal address, and partial payment card details -- all categories of personal data under the DPDP Act, 2023.

5. Remedial & Preventive Measures Taken

- Suspicious session automatically isolated to a decoy data environment.
- Real-time alert generated to the Data Protection Officer / admin.
- Attacker source attributed via canary-token forensic technique.
- Report auto-generated and logged as submitted to the Data Protection Board.
- Incident logged for audit trail and regulatory reporting.

6. Alert Log

No alerts recorded.
