TRAPWIRE – Data Breach Notification Report

FINAL / UPDATED REPORT

Automatically generated and submitted to the Data Protection Board of India under the Digital Personal Data Protection (DPDP) Act, 2023

Incident ID	INC-48622E37
Detected at (server time)	2026-10-04 18:23:42
Report generated at	2026-10-04 18:23:46
72-hour reporting deadline	2026-10-07 18:23:42
Hours remaining to report	72.0
Compliance status	WITHIN 72-HOUR WINDOW

1. Nature of the Incident

An in-band SQL Injection attack (CWE-89) was intercepted against endpoint `/api/orders` (Payload: `' UNION SELECT username, password FROM users --`). The query was quarantined to an isolated synthetic honeypot table. No genuine database records were exposed.

2. Data Access Event (captured at time of download)

Timestamp	2026-10-04 18:23:42
Source IP (as seen by server)	152.57.115.171
ISP / Organization	Reliance Jio Infocomm Limited
User-Agent	python-requests/2.32.3
Data served	Synthetic decoy dataset (honeypot); all sensitive fields SHA-256 hashed before export — no

Note: any apparent IP masking (e.g. VPN) affects only the client-side display — the server-observed source IP above reflects the actual network connection used to request the data.

3. Attacker Attribution (Canary-Token Confirmation)

Timestamp	IP Address	ISP / Org	Screen	Timezone	Platform
18:23:42	152.57.115.171	Reliance Jio Infoc	2560x1440	Asia/Kolkata	Linux x86_64

The attacker's apparent network location was masked at first login (e.g. via VPN/proxy). A canary token embedded in the decoy data export phoned back when the attacker opened/previewed the file, revealing the true connecting IP address and device fingerprint captured above -- via ordinary browser JavaScript in that one preview tab, no exploit involved.

4. Data Categories Potentially at Risk (if defenses had failed)

Name, phone number, email address, Aadhaar number, PAN, postal address, and partial payment card details -- all categories of personal data under the DPDP Act, 2023.

5. Remedial & Preventive Measures Taken

• Suspicious session automatically isolated to a decoy data environment.

• Real-time alert generated to the Data Protection Officer / admin.

• Attacker source attributed via canary-token forensic technique.

• Report auto-generated and logged as submitted to the Data Protection Board.

• Incident logged for audit trail and regulatory reporting.

6. Alert Log

Time	Level	Message
18:23:42	WARNING	■■ ATTACKER LOGIN ATTEMPT: Operator 'unknown_hacker' attempting authen
18:23:42	CRITICAL	■ HACKER WORKSTATION ACTIVE: Attacker 'root' successfully logged in to
18:23:42	CRITICAL	■ STATUTORY DPDP BREACH REPORT AUTO-SUBMITTED TO DATA PROTECTION BOARD
18:23:42	CRITICAL	■ SQL INJECTION EXPLOIT DETECTED: Malicious payload `' UNION SELECT us
18:23:42	WARNING	■■ INTRUSION ATTEMPT: Failed authentication #1 on user 'admin' from IP
18:23:42	WARNING	■■ INTRUSION ATTEMPT: Failed authentication #2 on user 'admin' from IP
18:23:42	CRITICAL	■■ INTRUSION ATTEMPT: Failed authentication #3 on user 'admin' from IP
18:23:42	CRITICAL	■ INTRUSION CONFIRMED: Suspicious login succeeded after 3 failed attem
18:23:42	CRITICAL	■ EXFILTRATION ATTEMPT DETECTED: Flagged session from IP 152.57.115.17
18:23:42	CRITICAL	■ STATUTORY DPDP BREACH REPORT AUTO-SUBMITTED TO DATA PROTECTION BOARD
18:23:46	CRITICAL	■ CANARY TOKEN TRIGGERED: Attacker de-anonymized! Source IP: 152.57.11
18:23:46	CRITICAL	■ FORENSIC ATTRIBUTION COMPLETE: Device fingerprint captured -> Screen
